

B05 - Cloud Platform Essentials

Course 2B DA-to-DE Bridge | Module Internal QA RC1

Canonical lessons	5 / 5
Structural / route / protection QA	211 / 211 PASS
artifact_tool workbook QA	36 / 36 PASS
Fresh Mini-Lab	HomeFix Field Service - independent domain
Old duplicate Mini-Lab	Rejected - not shipped
Gate A/B/C bytes	Exact audited baseline parity
ZIP CRC	All 5 inner ZIPs PASS
Duplicate-hash groups	0 before release controls
External media dependency	0 required
PDF render QA	12-page book + all review PDFs inspected at 200 DPI

Curriculum decision

Seven baseline lessons are compressed into five Bridge lessons without dropping the assessed platform competencies. Fabric is used as a concrete example, not as a hidden certification or tenant prerequisite.

Assessment decision

The old Distribution Mini-Lab duplicated guided practice and is replaced by HomeFix. Gate A Manufacturing Quality, Gate B Digital Advertising and Gate C Travel Bookings remain fresh full cases; B/C stay sealed unless explicitly assigned.

Course 3 boundary

No live Fabric provisioning, Spark, deployment, secrets implementation or tenant administration is claimed. C3-00 and C3-07 own those skills. B05 proves platform reasoning, access/network, freshness/monitoring and handoff readiness.

Release boundary

MODULE INTERNAL QA PASS - NOT COURSE FINAL. Real Fabric tenant/device execution is optional evidence and is not fabricated. Course-level Mentor synchronization, B06 capstone/C3 entry, whole-course simulation and final packaging remain pending.
