

B06 Gate A Review - Retail Orders

OPEN ONLY AFTER the complete Gate A attempt is saved.

Objective controls

Control	Expected
customers	24
orders	72
order_items	144
returns	18
customer_profile_changes	29
orphan_return_rows	1
duplicate_effective_customer_change_pairs	1

Readiness rubric and route

Strong evidence: SQL grain/staging/windows/time/quality/reconciliation; reusable/logged/validated Python with safe rerun/recovery; fact/dimension/key/history reasoning; SCD/layers/replay; BLOCK/WARN + independent reconciliation; independent case defense; source/access/refresh/monitoring reasoning; professional handoff + owner/limitation/next action.

Critical blockers

Silent loss/duplication; trusted publish after critical failure; wrong historical answer; unsafe rerun; hard platform constraint ignored; cannot recover/explain failure; protected attempt contamination.

Routing

PASS -> complete C3 readiness scorecard; no Gate B. Narrow weakness -> targeted repair + changed check. Broad/critical instability -> Gate B only if this review explicitly assigns a fresh full reassessment.
