

B06 Start Here - Bridge Capstone & C3 Entry

Two lessons. One genuine guided capstone. One protected final entry Gate. No percentage shortcut.

Open first

1) B06_BRIDGE_CAPSTONE_C3_ENTRY_LEARNER_BOOK_RC1.pdf. 2) For B06-L01 open B06_CAPSTONE_EVIDENCE_WORKBOOK_RC1.xlsx. 3) Use the SQL/notebook scaffold and Practice_Data. 4) Save complete attempt. 5) Only then open protected capstone review. 6) Complete B06-L02 and the protected Final Gate route.

What to save

SQL file, notebook, evidence workbook, validation/run evidence, failure/recovery evidence, changed retry, Gate attempt, readiness scorecard and final handoff.

If stuck

Return only to the exact weak B01-B05 competency. Do not open protected reviews or Gate B/C for hints.

Ready to continue

B06-L01 -> evidence complete + changed transfer. B06-L02 -> Final Gate PASS + every readiness floor met + no critical blocker.

C3 boundary

Linux/WSL2, shell, Git, venvs/dependency pinning, packages/project structure, config/secrets, logging, testing, CLI, Docker and runbooks are taught in C3-00. They are not hidden B06 prerequisites.
